SHADE

Copic Grays are staples in the toolbox of creative professionals and with 46 shades there is a specific tone for every need. To choose a starter combination for less experienced users, we have developed mini palettes. A few grays kick-starts you in sketching and elevates the practice of every budding artist.

Manga – Sketching – Illustration – Lettering – ∞

Gray shades & multiliner

Every Copic user also uses a fineliner. We included a perfect match to add extra possibilities to be precise with the fine details, invisible or nuanced when it is needed to achieve a more realistic result. It also enables subtle contrasting combinations with lines and tones.

A classic yet contemporary range with broad appeal. The sets are available in two formats: 4 or 6 tools – combining markers and a multiliner.

Artists can collect the full series by purchasing the smaller sets one by one without duplicating any tools, or opt for a ready-to-go selection of core shades in either a warm or cool palette all at once.

Warm & Cool Gray

If you're looking to dive deeper into the world of gray tones, Copic has thoughtfully crafted sets to elevate your shading game. Choose from two carefully curated collections, each exploring warm or cool gray families with five expertly selected shades and a leading tone for emphasising details. These expanded palettes make it easy to achieve refined gradient transitions, adding nuance, depth, and atmosphere to your work.

Whether you lean toward subtle bluish undertones or prefer a hint of earthy brown, these sets let you tailor the mood and storytelling of your artwork with precision and elegance.

Grays make it easy:

- To create depth and 3D effects when layering and blending them.
- To add darker or lighter shades in the same color family for more contrast.
- Ideal for many techniques such as adding cast shadows, modifying and toning down colors.

Super brush nib

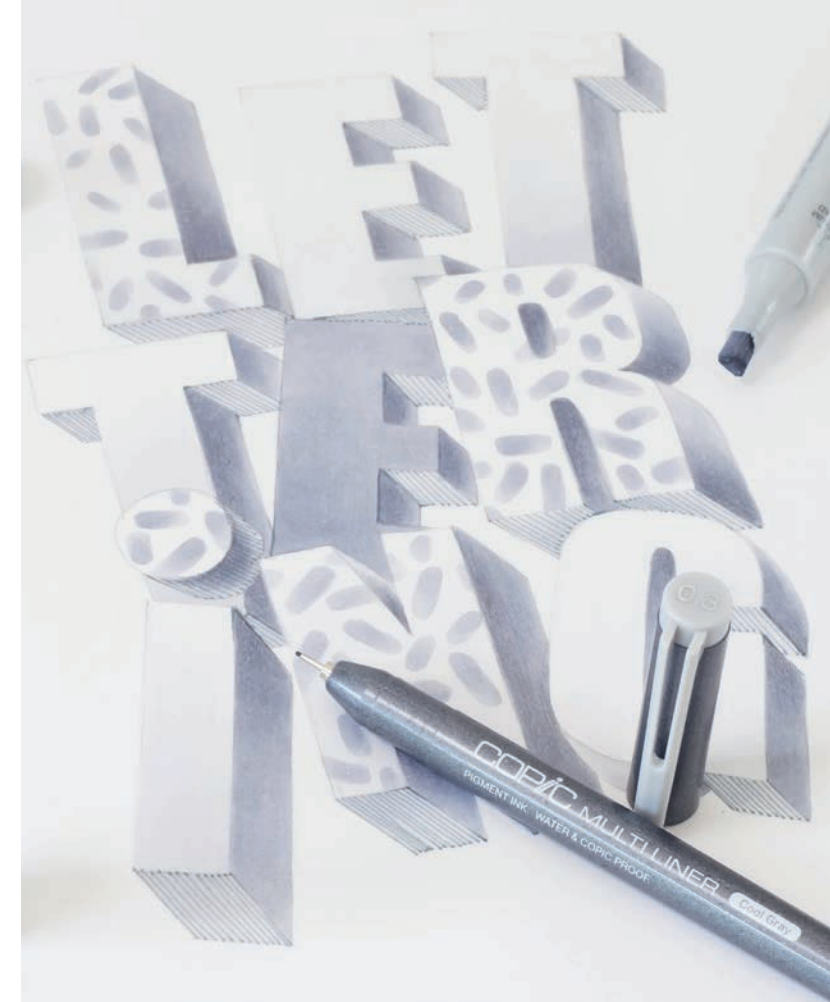

The super brush is the perfect tool for blending and a variety of strokes with an in use feel similar to a paint brush and responds to pressure.

Medium broad nib

The firm chiseled nib is ideal for textural marks, fast coverage and straight lines. It allows for varied line widths depending on the angle applied.

Multiliner

For full nib versatility a color matched Copic Multiliner is included for outlines and precise details. Light sets include a 0.3 mm nib size, while dark come with 0.5mm.

Shade 3+1

2 bestselling grays divided into 4 sets of 3 shades: warm or cool gray in either light or dark tones. These bestselling color families give the choice of a gray with a hint of brown or blue to accommodate personal preference and to achieve very different end results.
